

ACCESS INFORMATION FAST IN AN EMERGENCY

When you need to run, grab and go with a portable Locket USB.

Last autumn, fires forced thousands of people in California from their homes with little or no warning. What did these families take with them as they fled? Their pets, their important documents, treasured family moments, insurance policies? Some did. They were prepared. Most were not. Many lost all of the data they need to live their lives, and all of their precious personal memories.

Disasters can occur at any time. Natural disasters like floods and fires, personal disasters such as identity theft, even family disasters with the

death of a loved one. Locket gives you a simple system to manage your family's vital facts and information.

With Locket, information is centralized and easy to grab and go. It gives you a disaster recovery plan for your documents by easily organizing and safeguarding precious information in one place. Take the portable Locket USB with you and access, even update your information from any PC. You don't need an internet connection. In the event of a disaster or emergency, react and recover quickly with Locket.
